

Pregnancy Profile™ Vest.

Designed for teenagers of middle and high school age, Pregnancy Profile™ is a wearable vest-like garment that replicates the visual appearance and actual feel of the third trimester of pregnancy. It simulates added pressure on the bladder, restricted breathing, fetal movement, pressure of fetal limbs and the effects of pregnancy weight gain such as more awkward movement and stress on the lower back. By wearing the device and completing the curriculum, teens not only learn about the effects of pregnancy but they are also able to experience what it looks and feels like to be pregnant.

- Visual** appearance (enlarged breasts and protruding abdomen) and actual feeling of the third trimester of pregnancy.
- Navy** blue color for longer wear and presentability.
- Adjustable** straps fasten easily and securely with padded shoulder straps for greater comfort.
- Designed** with a rib constrictor that simulates shallowness of breath and fetal limb pressure, a removable water-filled bladder with a suspended weight that replicates mild fetal kicking and a bladder pressure bag.
- Includes** embroidered maternity t-shirt to wear over the vest.
- Low-weight** vest stores conveniently in a compact, handy, lightweight carrying case included in package.
- Curriculum** has 10 lesson plans with classroom activities and student worksheets.
- Includes** 18x24-inch laminated "Timeline of Pregnancy" diagram showing fetal growth
- Limited** two-year warranty
